Replacement of three existing containers with two larger ones in a differant position on site, and erection of lightweight domed shelter between them for storage purposes, (corrected description)

Dear Sirs

I write the strongest objection to the above Planning Application, proposing to increase the size of the already very high hideous over sized metal Containers that have appeared at the bottom of my garden of my house 48 St Richards Rd Portslade. Condemning my property to such a monstrous outlook, overshadowing my garden, and viewed from all the rear windows of my house , at such close range! These large Containers rise up high behind a tall ancient pretty pebbled wall destroying the character of the wall.

On 30th June 2017 shocked at discovering this (the property has been let for several years) I immediately wrote a complaint to Adur Council Planning Enforcement (see attached e-mail) To make a complaint and ask if these containers had ever obtained Planning Permission.

I am asking that these gross ugly metal containers are moved elsewhere so that they cannot continue to damage the rear views of the residential houses on St Richards Road, who I believe never gave consent to this high hideous construction of containers!

My house 48 St Richards Rd is now let once again. For all correspondence

please write to :

19 Manor House Street Peterborough PE1 2TL.

[redacted]

Margaret Randall

Please see attached e-mail written last year to Planning regarding this.
