Dear Mr Barnett,

RE FELLING OF SILVER BIRCH 14 WUERENS PLACE

I am in full agreement with the decision of my neighbours (14 Queens Place) with their proposal to fell the silver birch in their back garden. While they and I are garden and tree lovers, this tree ids in an appropriate situation for its height and rate of growth. It obscures much light from my garden, so much so, that after mid afternoon we receive no sun in that area and I am unable to grow the plants I wish. Several, in fact, have died. The leaf fall in autumn has destroyed a gravel garden path in that area of my garden.

As a rule, I di8slike tree felling and have championed the lime trees in Queens Place but, on this occasion, I hope that my neighbours will be able to carry out this work. I understand they are planning to replace with a smaller, slower growing tree.

While writing, I should li8ke to draw your attention to the way the twitten that runs from, the back of my garden and along for several houses is being used. I u7nderstand this to be an entrance and exit for wheelie bins and work carried out on houses by workmen. Instead, it is becoming a dump for objects that people don't wish to have in their gardens and also, in some instances, is seen as an extension of their gardens. Perhaps you can advise on this?

Yours sincerely,

[redacted]

Jennifer Pulling
