Stance: Customer made comments in support of the Planning Application

Reasons for
comment:

Comments: I offer my full support for this application. The upkeep of the land and attention to detail are of an exceptionally high standard, and the pride taken in its maintenance is clearly evident. We are grateful for the significant time, effort and financial investment Mr Lister and his family have made in improving and maintaining the land. There are no issues with parking, as the family have ample space on their own land and do not rely on on-road parking. The family are not the cause of any increase in traffic within the area. Any rise in traffic is due to the excessive number of new homes built nearby and the Village increasingly being used as a cut-through route. If any property were to be affected by traffic along the lane, and therefore in a direct position to comment on any impact it may have, it would be ours as we live directly next to it; however, we have not experienced any additional impact beyond what would be considered normal.

Similarly, any parking issues in the area are a result of insufficient parking provision for surrounding properties, not something caused by Mr Lister and his family, who have adequate parking on their own land.

Based on our direct experience, there are no concerns regarding parking or traffic associated with this application and we fully support it.
