Dear planning committee, I know there has been much debate over all the building that has been going on in and around Shoreham, now surely you cant be thinking about passing this application,???? 52 houses ,, 104cars,, already a congested road, where will all the children go to school???? and which school, as already all the schools are crammed,, what about health services,, pollution,, already a study has been done and Shoreham is already a high risk area to children and people with breathing difficulties,, am I right in thinking the people that put these plans in do not live in Shoreham? otherwise they would know all about the congested roads which is now getting worse,, what about the access coming out onto a busy road , as many people try to avoid the A27 ..and I mite add we are going to be grid locked when ropetackle houses are all finished,, thats already a bad area < I have to say I feel the success of Shoreham is going to be its down full because in time with all the plans for the 259 nobody will want to come here as they wont be able to get in or out,, Please reconsider these plans ,, why take away another green space,,???
R.BRIDGMAN
