Re planning for MAKO Hair Design 27 High Street Shoreham by Sea BN43 5DD

To whom this may concern

This is just a short statement to explain why we are wanting to put up tiles on our shop front.

The tiles we propose to use will be a Black Porcelain tile. The size of them are 60cm x 60cm.The area tiled would be approximately 4-6m2. They will only be used on the shop level of the address. At present we have rendering and looks quite shabby. The proposed tile will look more appealing as we have two empty shops next to ours, and would make it more endearing but not offensive. There are also other shops in the High Street that have tiles on their fronts. These tiles will make the front surface appear clean and crisp but also easy to maintain. As hairdressers we need to keep encouraging new and existing business into the town and also to maintain a level of freshness.

Yours sincerely
