Comments:	Hi I live right on the back of these trees for 9 months now and my garden at times is unusable. I have had 7ft branches coming down along with hundreds of varies sizes one the size on my dog (large dog) fell right beside him and would have caused serious injury. I also have a 16 month old daughter who in better weather would

benefit from being able to use the garden but at this time I would not feel it safe for her to be out there.
I have also seen a few on the branches touch my neighbours roof in bad weather and have concerns of damage to their and own property.
On top of this the amount of foliage and sticks coming down is making near impossible to keep things alive in my garden. We seeded the ground in an attempt to grow grass however soon as autumn came lots of grass and smaller flowers got killed off which I believe isn't great for the pollinators in the area if we can not grow simple flowers to feed them with.
Along with this the rear gutters are constantly full we have had people out to clear them twice now since living here as I am of only partial mobility due to my disability I can not clear them any more frequent. This has caused massive leaks and the gutter becoming loose.
My last thing is light. The rear rooms in the house never get direct sun light and we have to have to living room light on in the day which isn't great along with those rooms being colder as a result.
I do not expect complete removal of these trees but a closer attention to regular maintenance along with removal of branches over hanging the gardens would make living here much better and safer for all.

Kind regards
