Dear Marie O'keefe,

We recently received the above letter regarding the planning application of the change of use of unit 6 Tungsten Building. As a company who deal with lots of important phone calls and office duties its important for us to be able to concentrate at all times to carry out these duties.

We like many other companies in the building need the up most professional atmosphere along with adequate levels of neighbourly noise. We therefor would like you to note our concern of potential raised noise levels to our business, our neighbours business's and local residents.

We would also note that this area is densely populated with local residents and businesses. There has been many street discussions between neighbours due to increased levels of traffic, parking and pollution levels in the area. This concerns us as we feel this office block wasn't designed for large amounts of people or designed for large amounts of noise pollution.

As we feel that this change of use could affect our business directly we ask you to take note of our comments and reply accordingly.

Thank you for your time.

Kind regards,

Jamie Howell
