PLANNING STATEMENT

Re: Proposed Outbuilding at Abinger House, Worthing

The proposed application is to demolish the existing brickwork store with a corrugated concrete flat roof & timber windows/timber door. Replace with a new single storey timber frame outbuilding to be clad with horizontal weatherboarding colour grey. New PVCu window and aluminium sliding doors colour grey.
The proposed outbuilding is to be used for storage for existing tools and a dedicated space for an art studio. The outbuilding has been designed to maximise the light for the art studio purposes.
