ADUR DISTRICT CONSERVATION ADVISORY GROUP

REPORT 29.8.2018

AWDM/1132 – 29 Pashley Way, Shoreham Airport

Members unanimously agreed to recommend that Adur D.C. APPROVES the amendments to Conditions Nos. B.1 B.2 & B.8 as they are broader based and aeronautically linked.

However, members expressed serious concerns re Conditions A.1 and A.3 particularly in view of the Applicant's Agents submissions from which it was felt that such amendments would enable the Applicant to engage in conducting businesses which are not aeronautically linked thereby setting a dangerous precedent for similar such applications being submitted. Therefore, it was unanimously agreed to recommend REFUSAL.

Throughout the history of Shoreham Airport there has always been a strict adherence to the planning tenet that all businesses wishing to operate from the site should be aeronautically linked, thereby protecting & enhancing this important asset.
