Comments: This is the 2nd application for a wind turbine for the Lancing Business Park to which I objected, on the grounds I stated previously for the first application of this type on the estate. Mainly that it is installing wind turbines by stealth, once you agree to one being installed what is to stop every business on the estate requesting to do the same as a precedent has now been set, it could open the flood gates for mass installations which are unsightly, spoiling the little views we have left of the South Downs. Lancing is supposed to be in the process of regeneration not being made unattractive for residents and business alike with unsightly installations. How would the cancel deal with mass applications of this sort from local residents? We pay our rates too and want the benefits of a nice area to live in. I do not expect any of the council will take any notice of what residents have to say on the matter and will be surprised if this does not go ahead and objections are ignored as previously. However perhaps small voices will be heard by someone with a bit of care and common sense and stop this

getting passed.
