19_400_PL43C	Building 3 Proposed Elevations2
19_400_PL44C	Building 4 Proposed Elevations1
19_400_PL45C	Building 4 Proposed Elevations2

These drawings are submitted following a late consultation objection from the Health and Safety Executive (HSE), following the Council's determination of the application. In order to address this objection it is necessary to provide separate stair and lift access from the basement to ground floor level to those which would serve the remainder of each building. These changes have been discussed with Adur Council's Planning Officers, who have not raised any objection to the proposed amendments.

The Appellant understands the need for these amended drawings to be subject to public consultation. In accordance with the Planning Inspectorate's guidance, the details of this consultation will be agreed with the Case Officer prior to it taking place.
