Hi Jason,

Thank you for the additional information there are no EH objections.

Regards

Michael Lavender

Hi Michael,

Please see the above email and attachment regarding your substation query at AWDM/0322/23: Holmbush Carpark. Does this information sufficiently clarify the noise concerns you hold? Please let me know.

Kind regards,

Hi Jason

Hope you had a good BH weekend. I've asked for the information that the EHO has requested, and have been given the attached certificate based on an equivalent substation in terms of noise. As you will see it is very technical (at least I found it so!) and I can't claim to entirely understand what is being communicated, but please could you liaise with the EHO and confirm that it provides the comfort they need?

Thanks

Jason

Hi Jason,

I regret to inform you that the officer is not satisfied with the information provided. To quote his response: ' I need to see the frequency octave or 1/3 Octave data. As I say it is the low frequency noise at 100Hz that is the issue with electrical substations.' Could you please provide details in regards to this.

Kind regards,

Jason Albon

Hi Jason – third e-mail of the day from me. Please find attached the noise specification of the substation (highlighted). At 0.3m the sound pressure is 49dB(A) – hopefully this will satisfy the consultee, can you let me know?

Thanks

Jason

Hi Jason – apologies for the quick fire e-mails, but I'm assuming that this matter is the only outstanding issue preventing your positive recommendation – however if there is anything else please could you let me know?

Thanks

Jason

Hi Jason

Thanks for this, the extension is agreed. I'm chasing the applicant relative to the substation information, as the information I have received is generic and further detail is needed.

Regards

Jason
