

Ash tree stands approximately 19m tall with a crown width from centre of 5.5m North, 6.5m East, 9m South and 5m West. After the requested works, there would be a residual height of 17m with a crown width of 5m North, 5.5 to 6 East, 6m South and minimal change to West except for shaping and blending.

Works are primarily for general upkeep and maintenance of the garden and to maintain the tree at a smaller size for the location whist lessening the impact to neighbouring garden and property.

Works would not be detrimental nor affect the amenity value.
