Comments Details

Commenter Type:	Member of the Public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I support this application for its environmental benefits & for the beneficial effects that this improvement to the turbine blades making them more conspicuous to flying birds in the locality. Having witnessed several times birds that have been horrifically maimed so severely & that some have died in pain close by and others that have had to be destroyed by local vets due to the severity of the injuries. I understand that in other countries by making this small change to the colour on the tips of blades that the numbers of birds injured has been significantly reduced .

Kind regards
