Dear sirs,

We have no objections to the above proposal of:
1 the demolition of the existing garage and
2 the construction of a new garage

We would like clarification on the process of the demolition of the existing garage and the removal of materials. We believe that due to the age of the building, that there may be asbestos present.

Please can you confirm that the appropriate steps are taken and enforced to ensure that this does not become an environmental hazard to the many neighbouring properties.

We have encountered a similar issue in Surrey, and from a health point of view we do not wish to go through this again.

Regards
Steve Jones
