Dear Jeremy,
I have just walked past the Amelia Close development that has submitted application AWDM/1173/18 (I see on the now displayed notice that the deadline is 20th Sept for comments) to trim trees T2, T3, T5 and fell/ replace T4 under a TPO 13.53/2/15(SW) because of their effect on light. Further to my comments submitted by myself online and those added by you on my behalf because I could not add the photo's attached to my original document. Please could you also add the following 2 photos taken by myself this afternoon.
These photos clearly show that in fact the residents have pulled their blinds/curtains shut to block out the light from the sun on the windows behind the trees and particularly the windows behind T4 a tree that the residents want felled due to 'a distinct lack of light indoors'. It looks like the residents are wanting to fell a perfectly healthy and deciduous tree for no good reason.
I hope the planning department will consider carefully, as they have done before with previous applications for felling trees with a TPO at this site and help preserve this tree.
Kind Regards
Mrs W Allen
