Dear Miss Mellon,

I refer to your application concerning the installation of a temporary refrigerated container at the above address.

There is a storage container already located to the rear (north) of the building but not in the position shown on the application details. See attached photo. The container is sited slightly to the north of the proposed site and occupies part of the turning space/fire access, which is of concern. Can you clarify whether this is the intended position for the container in question and, if so I will need revised drawings from you and I will need to forward these to consultees.

Regards,

**Rebekah Smith**
