AWEN/0189/16 - 121 Brighton Road, Lancing

Please find attached a photograph showing location of proposed planting for the front fence on the above property.

We have sourced a number of trailing clematis, which will include Viticella, Alpina, and Macropetala, to enable variable season flowering.

The sourced plants are grown in 2 litre pots on 3 feet canes, they are all 2 years old and fully hardy when sent out, measuring around 1m tall.

Examples can be seen on
