Subject: AWDM/0395/25: Former EDF Car Park
To: Louise Prew <louise.prew@adur-worthing.gov.uk>

Hi Louise,

As the car auctions are using the facility to valet cars we will need to know what drainage they have in place for the runoff from the car washing. There is nothing on the application.

The run-off from vehicle washing and cleaning activities can damage the environment and pollute water courses if released into surface water drains. It's the dirt, brake dust, traffic film residue and oil that is washed off that causes the pollution. Furthermore some cleaning agents can be poisonous to river life. This trade effluent needs to be disposed of via a sewer with Southern Waters permission. See the Government's guidance. https://www.gov.uk/guidance/pollution-prevention-for-businesses

There are no other adverse EH comments for this application.

Regards
