Control charging sessions in a way that works for you – whether planning around your regular driving routine or setting a one-off schedule for the desired charge and departure time.

Easy energy tariffs integration

Connect your charger to your electricity tariff and let Ohme automatically schedule your EV to charge during off-peak hours.

Monitor energy usage

Keep an eye on your car charging costs and every kWh used to better understand your energy usage at home.

Solar charging

Activate our Solar Boost feature in the app and use solar energy excess to charge your car with green energy.

Multicar

Save and switch seamlessly between your cars in the Ohme app. Easily track charging sessions for each vehicle in just a few taps.

ie	Really smooth install and super easy to use. Links really well to my energy provider.	From first communication to installation, the process has been seamless. What a great introduction to the world of EV.
	Tim E.	Sarah W.
