Comments Details

Comments:	Traditional window designs are important to the integrity and character of the Warwick Gardens Conservation Area. The Worthing Society objects strongly to this proposal to replace the existing double hung sash windows at No 26 with uPVC casement windows. Ideally, the windows should be replaced with timber sash windows, which can be double glazed. Failing this, good quality uPVC sliding sash windows to match the existing designs might be acceptable, depending on the views of the Council's Conservation Officer.
