We were concerned and most surprised that the original planning application was given consent for a cattery of 10 cats. This is a residential area and not a business one, so we are even more concerned about this current application to extend the cattery to 17 cats . What other proposals will be put forward in the future for yet more extensions?

We understand the service drain for no 9 is situated under our garden and sideway, on its way to the main drain in Allendale Avenue. If this drain is used to clear effluent from the cat pens, can this cope with the extra waste that will occur over and above normal household waste?

We are also concerned about the increase in cats visiting or passing through our garden and digging and leaving their calling cards at back and front of our property. We are certainly not suggesting that our visiting cats come from No.9, but have more likely been encouraged by the presence of the cattery.

We are also unhappy that in the effort to portray the presence of the cattery in Allendale Avenue, Google Advertising gives a false impression of the cattery, with pictures of No1 and No 3 Allendale Ave, with no sign of No 9!

Yours sincerely,

[redacted]
