For the attention of: Mr Peter Barnett (Case Officer)

Dear Sirs,

Having received and read your letter concerning the roof extensions at 124 Greenways Crescent. I went to view the plans at the Adur District Council Offices.

I am very concerned about the size of the rooms in the roof, in particular the giant box shaped one at the rear of the property. Almost like putting another bungalow on the roof.

It would totally remove all of the privacy from our back garden and it would overlook our conservatory which has a glass roof. It would loom over our shoulders going down the garden and we will face it coming back up. As for sitting or working in the garden it would be constantly within our sight. For some neighbours it will remove a large area of their natural light.

As for the extra parking it might bring out in the Crescent, there are already problems with parking by patients and visitors from Southlands Hospital, not wishing to pay parking charges.

Surprisingly, nobody from the Planning Office has contacted us to make a call and see how it will affect us and hear our views.

One of the neighbours had a roof extension done a few years ago. It was tastefully done at the front and rear and blended in with the surrounding properties.

In my opinion a downsizing to more modest extensions, much less imposing and obtrusive, could be acceptable.

I hope you will take the time to read and consider the comments I have made in this letter and act accordingly.

Yours faithfully,

[redacted]

Vera Easen (Mrs)
