Report to Worthing Borough Council Planning Dept Regarding TPO on Silver Birch

BOROUGH OF WORTHING
DEPOSITED
TP. REF. No.
WB/

Meeting Date: 27 January 2011 @ 9-30 AM

Meeting Site : 5 Chute Avenue, Worthing, West Sussex BN13 3DX

In attendance : Peter Whish Worthing Borough Council

Carl Moore Architect

John Williams Client

The meeting was arranged to ascertain if there would be any detrimental harming to the silver birch.

Prior to the meeting a trench was dug to the depth of three foot as requested by Peter Whish in previous e-mails to Carl Moore. No large root systems were unearthed at this time.

On the day of the meeting Peter Whish inspected the trench from all different angles in the area which would be the new back wall of the garage (West). The only question put to me (John Williams) was" had the trench hit firm ground". I then replied that "At that depth of three foot I had hit large flints" he confirmed this by using a spade to check the bottom of the trench and agreed with my comments.

Peter Whish then requested that he wanted to dig a small trench on the boundary line which would form the side of the garage (North). In this small trench a large root was unearthed. Asked if this would cause any problem to the tree, Peter Whish informed us if the root was cut cleanly there would be no adverse effects to the tree.

In accordance with Peter Whish's e-mail dated the 1st February 2011 to Matthew Porter I confirm that all conditions stated will be adhered to as requested and all roots cut cleanly.

Photos attached as requested.
