SIDE CASEMENT AND TOP HUNG OPENERS

Existing windows to be carefully removed and new windows set in as previously, make good any render or brickwork with white silicone. Bay window roof structure to be supported during replacement and steel posts installed in corner of bays.

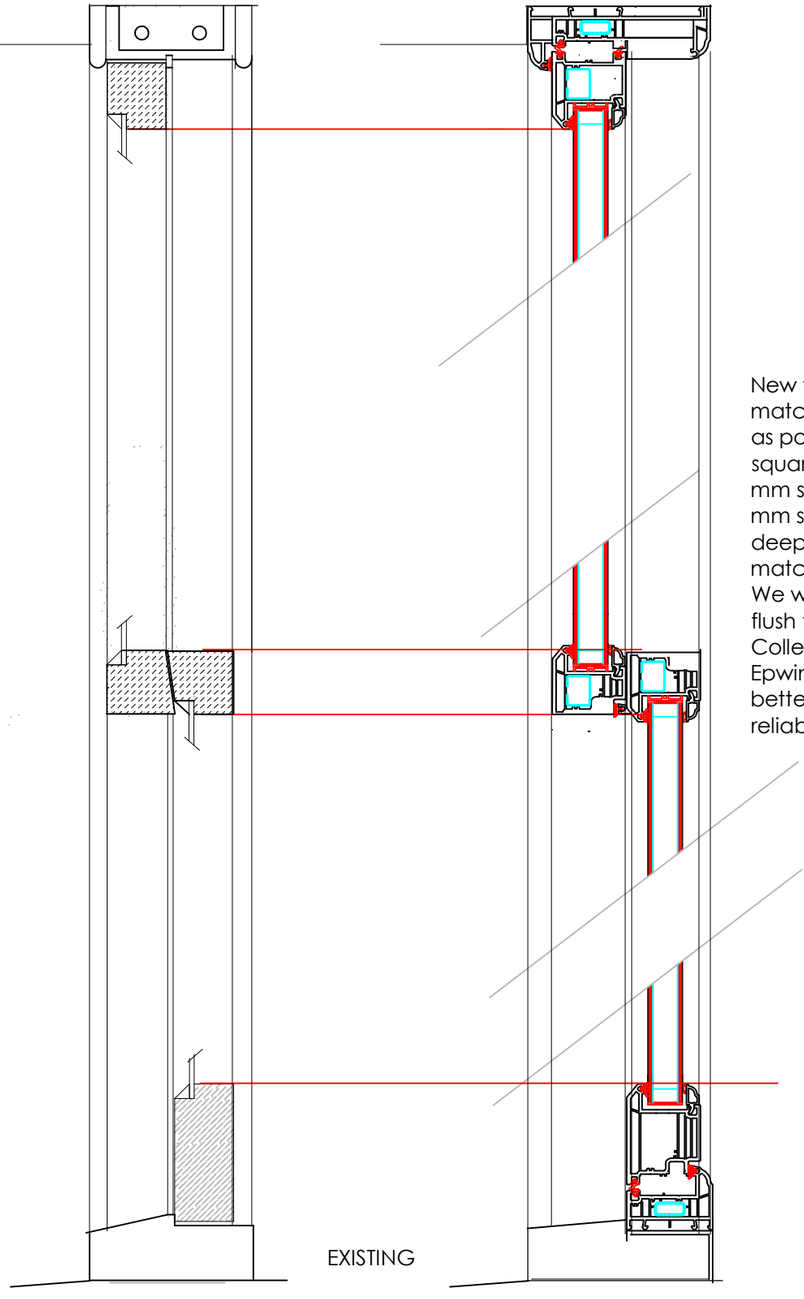

New windows to be made to match the existing as close as possible utilising the string detail and using either Rehau RIO flush fit window or Residence Collection 9

New windows to be made to match the existing as close as possible utilising the 50 mm square profile string detail, 25 mm spacer middle and 43 mm spacer at base with deeper bottom rail to matche the existing profile.
We will use either Rehau RIO flush fit window or Residence Collection 7, but preferably Epwin Fully flush which are better made and more reliable to keep weather out.

HORIZONTAL SECTION THROUGH BAY WINDOWS

VERTICAL SLIDING SASH WINDOWS

New windows to be made to match the existing as close as possible utilising the 50 mm square profile string detail, 25 mm spacer middle and 43 mm spacer at base with deeper bottom rail to matche the existing profile.
We will use either Rehau RIO flush fit window or Residence Collection 7, but preferably Epwin Fully flush which are better made and more reliable to keep weather out.
