Dear Louise,

Further to our emails please accept this email correspondence as confirmation that our client and any contractors will respond to any noise complaints within a 24hour response time period. We acknowledge also that the noise report that stated that if no response was received within 10 days, then this could be escalated to Worthing & Adur within 10 days is misleading. The link below clearly identifies the process for any noise complaints, including construction, as well as containing the form to Adur & Worthing, should our client and their project team not respond. These are not time specific.

https://www.adur-worthing.gov.uk/noise/report-a-problem/#:~:text=If%20the%20noise%20nuisance%20persists,us%20using%20the%20form%20below.

We hope this clarifies the situation and look forward to receiving the formal discharge of the condition this week relating to noise and boundary treatments as I believe this is now the only outstanding matter. In regard to the drainage submission on the 24th Feb please could you confirm if you expect this to be a 14 day reconsult with WSCC or 21 days. We look forward to your clarification you now have everything you need.

Kind regards

Suzanne
