Reasons for comment:	- Other
----------------------	---------

Comments:	<p>Here is a clearer, more formal, and more persuasive version of your objection: I wish to formally object to the proposed development on the grounds of flood risk and its potential impact on existing residents.</p> <p>The site lies along the route of the historic brook that runs between Underdown Road and Southview Road. This watercourse continues to play an important role in local surface water drainage. Any development that obstructs, diverts, or builds over this natural flow path risks significantly increasing flooding to the surrounding properties.</p> <p>Residents in the immediate area already experience serious flooding issues during periods of heavy rainfall. Approving a development in this location would almost certainly exacerbate these existing problems, potentially resulting in damage to homes, increased insurance costs, and significant distress to those living nearby. The cumulative impact on drainage and runoff must be given very careful consideration.</p> <p>Furthermore, similar applications relating to this site have previously been refused. It is deeply concerning that developers are able to resubmit proposals repeatedly, requiring residents to continually defend their homes and raise the same objections year after year. This places an unfair and ongoing burden on the</p>

local community.

For these reasons, I strongly urge the Council to refuse this application in order to protect existing residents and avoid worsening an already serious flooding situation.
