Hi Hannah

Thank you for the extra information, with those figures it doesn't look like this will cause a noise problem.

Dear Mark Winters,

Please see comments from my Environmental Health Officer below.

Please could you respond and provide this additional information to allow for her to assess the proposal.

Please forward details to me and I will forward on.

Thank you
Hannah

Hannah

In order to make a proper assessment I need to know exactly which outdoor units are to be installed (model number) as I believe the information sheet covers several different models.

I will also need to know at what distance the sound pressure levels of the outdoor units were measured as I can't see this in the information.

Many thanks

Joanne

Please see below A/C unit details in relation to AWDM/0543/17 as you requested.

Please can you let me know if you have any issues?

It should be noted that the condition relating to the other 2 a/C units has not been discharged. The information provided here (should it be to your satisfaction) would be the same as that information required to discharge the condition. However without the submission of a formal application to discharge such condition then we cannot confirm that the conditions have been formally discharged. Yet there would be no grounds to enforce against this matter if the applicant decided not to submit the discharge of conditions application in this case.

I hope that this makes sense, please let me know if you need any further information.

Thanks
Hannah

Dear Ms Alvin Chantler,

Following submission of AWDM/0543/17 I have received the comments below from Environmental Health. Please could you email details as required for me to forward on or speak to Joanne Lewis directly if you require. Sorry for the delay. This application has been re allocated to me.

Thank you
Hannah

Peter

AWDM/0543/17
Northbourne Medical Centre, 193 A Upper Shoreham Road

I refer to the above planning application and raise the following issue;

I see this application is for 1 additional air conditioning unit. Am I right in thinking that condition 8 of the previous application AWDM/0703/16 relating to 2 other units has not yet been signed off?

"Prior to commencement of the development the specification details of the externally-sited plant outlined on the approved plan, including details of noise emissions and attenuation measures, shall be submitted to and approved in writing by the Local Planning Authority. Thereafter, the external plant shall only be installed in accordance with the approved details and the acoustic attenuation measures as agreed."

In order to assess whether the cumulative impact of the proposed and previously approved air conditioning plant will have an affect on neighbours I would need to see the specifications of all of the plant to be installed.

The applicant(s) needs to provide a frequency analysis of the noise produced and Sound Pressure Levels at a specified distance and the affects of any attenuation. The manufacturer should have this information and I would need this for all the units to determine if noise will affect residential amenity.

Joanne
