Good morning Calum,

I hope you're well.

Our Environmental Advisors have confirmed that a barrier pipe is not required to complete your new connections. The remediation method statement relates to contaminants that would not impact upon the integrity of PE pipes.

I have also spoken to IT regarding the applications not showing on your dashboard. They have looked into this further and you should now be able to view both S45 10725 and S106 10726. Please could you check your portal?

If you are still unable to view the application, we will manually accept your S45 application and email you over our 'ways to pay' information and Notification of Proposed Works form.

Thank you for your patience whilst we were looking into these technical issues and please let me know if you have any questions.

Kind Regards,
Sophie King
Water Connections Advisor
