Sirs

With reference to the above planning application it has come to my attention via an article that will be presumably printed in tomorrow's Worthing/Lancing Herald that this application has been recommended for approval. If this is indeed the case, then the Planning Department of this Local Authority really need to be taken to task and re-consider their decision. It is clear, if this decision is correct, that the local planning authority have no interest whatsoever in the objections and concerns raised by residents in close proximity of the proposal. They also appear to discount and disregard comments made by Tim Loughton (MP for East Worthing and Shoreham)

In my earlier objection to this proposal I raised various questions including those relating to ownership of the land, restrictions, and possible future development, none of which have been answered as far as I am aware. Can we have some answers please

I therefore repeat my objection to this development, in the strongest possible terms and suggest that the planning department 'think again' and listen to those local residents that WILL be affected

Yours sincerely
