Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Trees and Landscaping
Comments:	This tree borders directly into the corner of our garden. Unfortunately over several years we have had trees removed or chopped down along this western border despite them being perfectly healthy. It is only recently that we have begun to get notification of planned changes. I had thought that trees in a conservation area were protected but this has not been the case to date. The last tree removed from this nursery garden was a cherry tree, a great shame. This Sycamore tree is indeed high but it does afford us shade in our garden and we note a home and a perch for wild life. We have no problems with this tree. However we can see that its branches hang over much more into the garden of the property behind ours. Due to the damage to other trees within the nursery garden and on this western border we would like the planning department to make sure that in this case no more than 2 metres is

removed from this healthy tree.
I can only say that tree surgeons used to date have 'butchered' trees' in this garden and it has been very upsetting.
Worthing should be proud of its trees and protect its few green spaces.

Kind regards
