Subject: 288101 D01 New assembly facility for Ricardo UK: South elevation materials

Peter

Thank you for your email dated 20.11.09.

It is noted that you require the high quality cladding to be extended along the remaining two bays of the south elevation facing the road. On the basis that you can deal with this change by a inserting a Condition in the Notice of Decision and that submission of amended drawings at this stage will not be required to complete the process, I can confirm that the applicant, Ricardo UK will agree to this proposal.

As we have discussed, the project programme is extremely tight and the conclusion of the planning application process is on the critical path as a milestone to be achieved prior to starting works on the site before the end of the year. Could you therefore please confirm that this change will not affect the issue of the Notice of Decision within the 8 week target period.

No doubt there will be a Condition relating to materials samples for the external envelope. We will submit the relevant products and drawings amended to show an agreed extent and location at the appropriate time for both the Kingspan and built-up cladding systems.

Regards

Simon Lawrence
