Subject: Shoreham Beach Green final 3d design

Dear All,

Please see attached final design which has gone forward for planning permission, which I hope will be approved at the Planning meeting Monday 7th December.

The Buccaneer climbing unit centre post is over 4 metres high, which is why we need planning approval and I will keep you informed as to any comments that are received and whether we need the local community to attend the meeting to show support, closer to the time.

In the final design you will see we have moved the Buccaneer climbing unit to where the old wooden unit is in the existing play area, this is to replace that worn out unit and position it in a better position to any residents that over look the site.

We have also managed to agree two extra's, a Rocking Horse and a roundabout which again will go on the existing site, as this will keep the new area more open and spacious

Once the site has been opened, we will look to add a perimeter fence, picnic benches, some trees and of course litter bins by new gates etc. This should all be within a month of opening, so be aware this follows on as quickly as possible.

Everyone, please see note below from supplier Wicksteed, which ROSPA are also pushing.

Clive

From Wicksteed

Hi Clive

With regard to the mound due to soil issues elsewhere we have just made a decision to stop covering the tunnel slides completely-we now propose to bury the slide so it is half in the ground & half out.

All

This I had queried, due to problems elsewhere and will be better for us, maintenance etc but the local children will spot is different from original design.

Clive
