

RICHARD MOORE TREE SURGERY

Tree Work Proposal

5 Rugby Road

Following my recent meeting at **5 Rugby Road**, we looked at four trees: **one Beech tree, one Maple tree and two Lime trees.**

I have previously maintained these trees, with the last pruning works carried out approximately **six years ago**. The trees are currently around **15 m in height** with a lateral canopy spread of approximately **15 m**.

Proposed works

The proposed works would be to re-prune all four trees back to their previous pruning points.

- Reduce the overall height by approximately **3 m**, from 15 m to approximately **12 m**.
- Reduce the lateral canopy spread by approximately **2 m**, from 15 m to approximately **13 m**.
- Retain a balanced and natural crown shape while returning the trees to their previously maintained dimensions.

All pruning works will be carried out in accordance with **BS3998:2010 - Tree Work Recommendations**.

Tree identification: T1 - Beech T2 - Lime T3 - Lime T4 - Maple
