Development Management - Delegated Officer Report

Application Number: AWDM/0506/21 Recommendation – REFUSE

Site: 39 Victoria Road, Shoreham-by-Sea, BN43 5LA

Proposal: Vehicular access

Date of site visit: 05.05.2021 Assessment has been assisted using the Applicants plan; Earthlight mapping; and Google 3D of the site

Neighbours checked: Y

Additional neighbour notifications: N

Site and Surroundings:

The property is a two-storey semi-detached dwelling, located on a corner site with Victoria Road to the east and Swiss Gardens to the north. There is an existing vehicular access off Swiss Gardens, accessing the side section of the site. The entire amenity area to the side and front of the dwelling is hardsurfaced. There are 2no. raised garden beds in the amenity area, both of which are of brick construction. The site has low boundary fencing, approx. 1m high, around the front and side of the site.

It does not appear that the other properties within this stretch of Victoria Road on the north side have gained a vehicular access onto their properties. Low walls, fences and vegetation are common boundary features in the street.

Proposal:

The application seeks permission to provide a vehicular access onto Victoria Road to the front (east) of No. 39 in order to gain vehicular access onto their property.

Representations: None

Consultations:

WSCC Highways:

The proposal is for the creation of a new vehicular access with hardstanding with a dropped kerb onto Victoria Road.

The proposed vehicle crossover will be subject to a licence obtained through the local area office and constructed to a specification agreed with the local area engineer. From inspection of the plans and local mapping, vehicular visibility at the proposed access appears suitable for the road speeds in this location.

Regarding parking, the proposed area of hardstanding is of sufficient size to allow for one off-street car parking space. On-site turning may not be achievable, so vehicles

may have to exit the site in a reverse gear. However, the LHA does not anticipate that this would give rise to a severe safety concern, given the good forward visibility along Victoria Road in this location.

In conclusion, the LHA does not consider that this proposal would have an unacceptable impact on highway safety or result in 'severe' cumulative impacts on the operation of the highway network, therefore is not contrary to the NPPF (para. 109), and that there are no transport grounds to resist the proposal.

Relevant History:

AWDM/1777/19 Two storey side extension to north elevation, together with a new 2m high boundary fence to Swiss Gardens. **Approved 26.02.2020**

Planning Assessment

Principle

The proposal comprises upgrading the existing housing stock located within the built up area and can be supported in principle. The relevant issues are the effects on the amenities of neighbouring residential occupiers and the effect on the character and appearance of the surrounding area.

Visual & Residential Amenity

There is no objection from the County Highways regarding the proposed dropped kerb, and they are of the view that the parking area is of a sufficient size. However it is considered that the formation of the access, with the associated removal of the front boundary feature and the use of the front amenity area for car parking is out of character with this section of Victoria Road. Furthermore, to create such a parking area would set a precedent for neighbouring residential properties to carry out similar development, the cumulative effect of which would be to harm the existing visual character of the street, particularly as neighbouring gardens are smaller in size and the impact of frontage parking will be more marked. Policy 15 of the Local Plan requires development to "respect and enhance the character of the site, and the prevailing character of the area." It is not considered that this proposal meets that requirement.

It is thereby considered that the crossover and creation of a car parking area to the front of the property will negatively impact on the character of the area and should be resisted.

Recommendation:

REFUSE:- for the following reason(s)

1. The formation of the vehicular access together with the removal of the front boundary feature and associated works to create a car parking area to the front of the property would have a harmful visual impact on the character and appearance of the area, and could set a precedent for neighbouring residential properties to carry out similar development, the cumulative effect of which would be to harm the existing visual character of the street. The proposal is therefore contrary to the policy 15 of the Adur Local Plan.

Informatives:-

1. Refused without discussion

Is recommendation contrary to letter(s) of representation? N
