Proposal, Site and Surroundings

The application refers to a single Holm Oak tree in the rear/side garden. The tree is in the southwest corner of the garden which is raised above the level of the road, with retaining walls to the north and south adjacent to a Public Footpath and the pavement of Mill Lane. The tree is a part of the street scene and makes a contribution to the character and visual amenities of the Shoreham Conservation Area.

Consent is sought to reduce crown height and radial spread one Holm Oak tree.

The reasons for the works are primarily in the interests of light issues and amenity value.

Planning Assessment

The tree is a small to medium sized mature Holm Oak growing in the raised peninsular of the rear or side garden. The tree has a single stem to 1.5 metres that divides widely with two main stems angled away from each other. Both stems break into the main dense bushy crown at 3 metres. The tree has been repeatedly reduced to form a tight domed crown.

The proposed works are to reduce crown height and radial spread by up to 1 to 2 metres one Holm Oak tree. The works are to contain the size and spread of the tree and continue with the previous management regime.

These works in my opinion would be relatively minor in relation to the overall size, spread and crown form of the tree and would not significantly or adversely affect its appearance, amenity value, or its contribution to the character of the area.
