Hi Rebekah Smith
I live next door to 1 West Way and the Extension that my Neighbour has put on the back of his house is far to big and has a window looking directly into my Kitchen and Lounge. I did ask him to do something about the window but he said he had the relevant planning permission. I found this very strange as we had not had any form of communication from the council or planning Being that we own our house.
We are now used to the size of the extension but had to erect a High plant frame to block off the view into our house. If the window was to be either blocked completely or at least have frosted glass i would not have a problem.
Please contact me as what to do as i am worried about the new people buying the house having direct view into my house.
My Number i[redacted] or reply by Email. Thankyou
