Comments:	I fully support this beautiful tree to have minor works due to dead wood which i can see from our garden. Plus to ensure the safety of the tree with the increase in extreme weather conditions. We have had dead wood land in our garden and on our glass roof of our conservatory. It would be beneficial to contain the spread of the canopy by 2-3 meters and create gaps inbetween the canopy to allow air to pass beneath the crown. Plus this will allow light into our garden and number 8's garden in which the sun disappears at 1pm. Many thanks H C Colgan
