Subject: Planning for Cricketers in Southwick
To: <marie.o'keeffe@adur-worthing.gov.uk>, <planning@adurworthing.gov.uk>

Dear Marie O'Keeffe
I have been unable to register on the website to fill in the right form to discuss the planning application made by the Cricketers pub in Southwick - which is to extend the beer garden etc.
Thanks for your letter telling me about it.
Here are my thoughts

I disagree with the erection of the high fence on the grounds of pollution.
At the moment there are trees and shrubs along that perimeter which filter traffic exhaust. The Cricketers under previous tenants, have already taken down one large tree.
The Twitten is a very small road which services three public houses.
These are the Ship, the Southdown Club and the Cricketers.
Also there is a bus service travelling along the Twitten every 10 minutes number 46.
[redacted]and traffic fumes make my condition much worse.
The proposed high fence would funnel the exhaust fumes.
So I oppose it on those grounds.

Also I worry about parking overload.
By taking part of the pub car park to increase hospitality, there will be more cars trying to find parking places in an already overcrowded area. Also at present, large lorries turn in that car park and that would be impossible if there are tables in the car park.

So I hope that is helpful
Yours sincerely
Susanna Chaplin

Ps
I have a traffic flow suggestion which I should like to be considered.
At the rear of the Cricketers to the east, the car park stretches from Southwick Square to the Twitten where at present all traffic enters and exits. It causes mayhem in the Twitten with huge lorries trying reverse out. (Twice they have knocked down my 6' high garden wall, and thirdly, once again hit it so it collapsed at a later date)

I suggest that a one way system for lorries be initiated from Southwick Square to the Twitten.

Please can you pass this on to the right department?

Yours again
Susanna Chaplin
