Expiry Date - 03/04/2025

Development Control – Delegated Officer Report

Application Number: AWDM/0149/25 Recommendation – APPROVE

Site: 145 Lyndhurst Road Worthing West Sussex BN11 2DG

Proposal: Proposed vehicle access (dropped kerb)

Date of site visit: 03/04/2025

Neighbours checked: Y

Additional neighbour notifications: N

Site and Surroundings:
No. 145 Lyndhurst Road is a semi-detached property which is located on the northern side of the road. The road comprises a large number of property types but is categorised by two storey properties.

There are a lot of properties along the road which have undergone the same sort of works, the closest of which is the neighbouring property to the west. There is plenty of on road parking on neighbouring streets.

Proposal:
Permission is sought to provide off street parking to the front of the site with a permeable surfacing 5.5m in depth with a width of 6.5m. The application also relates to a vehicular crossover of the public footpath.

Relevant History: None

Consultations:
WSCC Highways:

This application seeks the provision of a new 3.5m wide dropped kerb. The site is located on Lyndhurst Road, a C-classified road subject to a speed restriction of 30 mph.

From inspection of WSCC mapping and the submitted plan, there are no apparent visibility concerns with the proposed point of access on Lyndhurst Road. The proposed access works will be subject to a licence obtained through the local WSCC Highway Area Office, and constructed to a specification agreed with the local WSCC Highway Area Engineer.

The proposed hardstanding appears of suitable size to accommodate 1-2 off-street car parking spaces. On-site turning does not appear achievable, so cars may have to exit the site in a reverse gear – However, the LHA does not anticipate that this would give rise to an adverse highway safety impact, owing to good forward visibility along Lyndhurst Road in this location. Neighbouring

properties operate similar access arrangements with no known safety concerns.

In summary, the LHA does not consider that this proposal would have an unacceptable impact on highway safety or result in 'severe' cumulative impacts on the operation of the highway network, therefore is not contrary to the National Planning Policy Framework (paragraph 115), and that there are no transport grounds to resist the proposal.

If the LPA are minded to approve the application, the following informative should be applied:

Vehicle Crossover – Minor Highway Works
The applicant is advised that in addition to obtaining planning permission that they must also obtain formal approval from the highway authority to carry out the site access works on the public highway. The granting of planning permission does not guarantee that a vehicle crossover licence shall be granted. Additional information about the licence application process can be found at the following web page: https://www.westsussex.gov.uk/roads-and-travel/highway-licences/dropped-kerbs-or-crossovers-for-driveways-licence/

Planning Assessment
Principle:

The proposal comprises the creation of a vehicular cross over on a residential property located within the built up area and can be supported in principle. The relevant issues are the highway safety, and visual effects on the amenities of neighbouring residential occupiers and the character and appearance of the surrounding area.

Visual & Residential Amenity:

Due to the relationship between properties and the main road a number of properties have converted their front gardens into off road parking and as such it can be considered the norm for the street.

Expiry Date - 03/04/2025

This application proposes a parking space which will sit vertical to the front boundary. The WSCC Highways raises no objection to the proposal.

Visually, the parking space will offer a good design and good use of materials, and the parking area will not result in any material loss of either residential or visual amenities to the locality.

Highway Safety:

Due to the location of the proposed driveway it is not considered that there will be an unacceptable impact on the highway safety. As highlighted by WSCC there are sufficient mitigations that would mean the proposal would not result in a severe impact to the highway network. As such it is considered that the proposal is policy compliant.

Recommendation:

APPROVE subject to the following condition(s)

1. Approved plans
2. Standard time limit

Informative:

1. Approved without amendment
2. Vehicle Crossover - Minor Highway Works

Is recommendation contrary to letter(s) of representation? N
