Good morning,

My name is Michael Macdonald and I live at Flat 2, 14 Tower Road BN11 1DP.

I understand that there has been a request to carry out the installation of containers in the car park behind my house.
Me and many of my fellow neighbours have all been caused a distress over this due to how it may affect our lives.

To begin with, our views from our windows will be taken over by the look of the ugliness of these containers.
Not only this, but we will no longer be able to enjoy our hard earned time in our gardens as these containers will cause lack of sunlight and increased noise.

Furthermore, the noise this will create would be unbearable, with having a 11 year old living with us and a 2 year old with our neighbours, the noise would could such a huge impact on our day to day lives.

We believe as a neighbourhood community that the installation of these containers would have a negative impact on our living environment and for that reason we all object to it going forward.

I look forward to hearing from you.

Kind regards,

Michael Macdonald
