Comments: As someone who works regularly in the parish centre and as a member of the Parish Church Council (PCC), I fully support these plans. Not only does the planned development significantly improve what has become over recent years a scene of increasing neglect and hazard in this important central location in the town, but will ensure the church has a new purpose-built offices and improved community space, as well as providing some much needed town-centre housing. The plans appear well thought through and the prospective developers have been careful to share these in great detail with the PCC. We feel confident that both town and church will benefit in many ways.

Kind regards
