To Whom It May Concern

I am writing to express my general support for this application having recently moved to the Manor House, which borders the development site.

The application, whilst not being perfect, offers a great improvement on the dated buildings that currently occupy the site. The proposed buildings have been thoughtfully designed to harmonise with the older structures close by and will enhance the outlook from my house.

I have asked the architect and developers to confirm that the fence between our properties will be retained at its current height and they have confirmed that this will be done - I would like this to be added as a planning condition.

I have also suggested that the roof material for the new houses should be clay tile rather than slate. There are no slate tiled roofs in the vicinity and use of this covering would be incongruous.

As with any development, there has to be a little give and take, but overall this application offers a sensible way forward for a site that is currently very tired and visually unattractive.

Best Wishes

Martin Webb
