Dear Jo Morin

Having made a mess of commenting on the above application for planning permission on line here are my comments.

I am delighted to have neighbours with a family who are thinking about the future and preserving the best of the past. To see a family house remaining a family house adds to the feeling of the neighbourhood - that this road is all about housing and not developing into blocks of flats or shops. These are of course necessary but as I live opposite in another 1930s house I'm all in favour of the work they wish to start. I bought my house because of the array of solar panels and am a great advocate for using as much alternative energy as possible. I have added a heat pump and was delighted that neighbours were curious and came to see it!

I have looked at the plans and would like to put in writing that not only do I have no objections but the opposite - it is a very sensitive way to modernise the house and I feel lucky to be living opposite and to be watching an upgrade which will leave the house almost the same to the eye but incorporates the best in what can be achieved in this century- and hope that there won't be any objections as this is the future! Rugby Road has a lovely mix of housing and I hope it stays that way - we look out for our neighbours. Parking here can be a real problem but myself and my neighbours who are applying for the above permission have off road parking plus a garage so don't even use up the precious space!

I hope this is of use when you make your decision and am looking forward to enjoying watching the works and the outcome.

Yours sincerely,
Jenny Blackie
