Subject: Planning Application No AWDM/0769/13

Hello

I have viewed the submitted application forms and plans and have no objections to the intended changes. I think that this is a very difficult project to make viable and that every help should be given to the developers to support their efforts to ensure that this development:

1) Is financially viable;
2) Is an asset to the local community; and
3) Brings this building into active use as soon as possible.

I think that approval of this Planning Application will support these objectives.

I agree to you sharing these views with members, the public and the applicant during the course of your consideration of this application.

Kind Regards
