I am writing to request permission to prune two lime trees located the property above.These trees are an integral part of our property's landscape, and regular maintenance is essential to both their health and the safety of the surrounding area.

The trees in question are relatively small and have been a part of our property for many years. In accordance with past practices and the guidelines set forth by the council, we have been re-pollarding these trees every three years. This routine maintenance ensures that the trees remain healthy and do not pose any risk to vehicles, pedestrians, or nearby structures.

The proposed works involve pruning the trees back to their previous pruning points. This measure is not only crucial for maintaining the trees' size and shape but also for allowing vehicles to park safely beneath them. The pruning will be carried out by a professional arborist who will ensure that all work is done in a safe and environmentally responsible manner, adhering to the best practices in tree care.

I understand the importance of preserving our local greenery and assure you that this pruning is solely for maintenance purposes and will benefit the health of the trees in the long run.

I have attached photographs of the trees and the previous pruning work for your reference. Additionally, I am more than willing to comply with any guidelines or requirements set forth by the council in relation to this task.

Thank you for considering my application. I look forward to your positive response and any further instructions or permissions required to proceed with the pruning
