Subject: AWDM/1358/25 - Response to LHA comments

To: Rebekah Smith <rebekah.hincke@adur-worthing.gov.uk>

Hi Rebekah,

I hope this email finds you well.

Following consultation with Highways, WSCC regarding application AWDM/1358/25, I wanted to provide some additional clarification in response to their query about whether the application includes a proposed increase in users or staff.

The primary intent of this application is to enhance operational efficiency (e.g., improving storage and optimising space), which the current layout does not adequately support. As such, the proposals do not intend to increase user or staff numbers at this stage.

That being said, the proposed extension does offer potential for future expansion. Any such expansion would only be pursued if it becomes necessary (e.g., upon reaching maximum capacity) and deemed suitable, subject to all required assessments and planning considerations.

Please don't hesitate to reach out if you need further clarification or assistance.

Best regards,

Simon Boseley
