Subject: AWDM/1774/23

Good Afternoon Jo,

I hope you are well.

In regards to the above application I require more information from the applicant before being able to discharge any conditions. There has been no report uploaded which proves that the intended/completed works to protect the occupiers from both external noise or noise from the premise beneath has been completed. In regards to the report titled "HYBRID COOLING SYSTEM", further explanation is required to show that this would provide sufficient air change.

Until I have seen these reports I am unable to recommend discharge of these conditions.

Kind Regards
