Proposal, Site and Surroundings

The application refers to a large early mature located near the northeast corner of the grounds between the boundary wall and the car parking area. The tree is a prominent part of the street scene and makes a contribution to the character and visual amenities of the Southwick Conservation Area.

Consent is sought to fell the tree.

The reasons for the works are primarily in the interests of safety, and amenity value.

Consultations: None.

Representations: None received.

Relevant Planning History

1976: The Southwick Conservation Area was first designated in June 1976.

Planning Assessment

The tree is a large early mature growing in a small border to the east of the church hall and north of the car parking area. The tree is prominent to the area, and can be seen from many views.

The tree has a single stem to 7 metres with the first significant sized secondary lateral emerging from 4.5 metres. The main crown is dense and wide spread with some slightly over extended laterals. The crown is completely defoliated with the tips of the main branches beginning to die back.

The proposed works are to fell the tree, which died earlier this season, possibly from Dutch Elm Disease.
