Dear Sirs

Re: Car Barn at 35 Arundel Road

We recently received and email from Ms Vanessa Green advising that our car barn situated on our driveway required planning permission, (her ref: AWEN/0082/24.) The car barn was constructed during the COVID months in 2020 and we were under the impression that a open wooden structure with a corrugated felt roof, would be considered a temporary structure and would not need planning approval.

As we have now been advised by Vanessa that this is not the case, we hereby submit this application.

As you will be able to see from the attached pictures and drawings the structure is mostly hidden from view by the existing hedge and sits below our property which is at a higher point on the land which rises from the road by approx. 2 metres, to our front door.

Yours faithfully

Simon Cook
